FM Mattsson GROUP

Are you a System Developer who enjoys turning business needs into smart, reliable solutions? At FM Mattsson, you'll work closely with teams across the organisation to develop and improve business-critical systems, with a particular focus on our ERP platform, Infor M3.

The role

Digitalisation plays an important role in how FM Mattsson continues to evolve. Our systems and digital solutions are designed to support our operations and help us work more efficiently. As a System Developer, you will join our Digitalisation team and collaborate with teams across the organisation to turn business needs and ideas into effective technical solutions. Your role will span development, integrations and problem-solving, with a particular focus on our ERP system, M3.

In this role, you will:

- Develop, customise and maintain internal applications and solutions within M3 and our wider system landscape.
- Develop and maintain integrations between M3 and other systems.

- Design technical solutions and help establish shared technical standards and best practices.
- Develop, test and quality-assure solutions, as well as troubleshoot complex technical issues.
- Contribute to and lead development and digitalisation initiatives.
- Collaborate with teams across the organisation, internal specialists and external partners, and coordinate external M3 consultants when needed.
- Help improve processes and ways of working across the organisation.

What we’re looking for

We’re looking for someone who enjoys using technology to solve real business challenges and is eager to understand what users and the organisation actually need. You are curious, pragmatic and comfortable working both independently and as part of a team. As you’ll work with people across different parts of the organisation, strong communication and collaboration skills are important.

We’re looking for someone with:

- A university degree in software development, systems design or a related field.
- Experience in software development and programming, preferably with Java, JavaScript and Angular or similar technologies.
- Experience working with ERP systems or other business-critical systems.
- A good understanding of databases, integrations and system architecture.
- The ability to understand business needs and turn them into effective technical solutions.
- Excellent written and spoken English, as well as Swedish if based in Sweden or Danish if based in Denmark.

It is an advantage if you also have experience in:

- Infor M3.
- Integrations and automation.
- The manufacturing industry.
- AI-assisted software development or the use of AI tools in development.

About FM Mattsson Group
FM Mattsson Group develops, manufactures and sells taps and related products under the well-established brands FM Mattsson, Mora Armatur, Damixa, Hotbath, Aqualla and Bristan. Our vision is to be our customers' first choice for bathrooms, kitchens and related areas. Our core values guide how we work together and how we engage with the world around us:

- The customer comes first
- We win together
- I step forward

In 2025, FM Mattsson Group generated revenue of approximately SEK 2.0 billion and employed around 560 people across Sweden, Norway, Denmark, Finland, the Benelux region, the UK, Germany and Italy. In 2026, the Group acquired Bristan Group in the UK, which had approximately 280 employees at the time of the acquisition. FM Mattsson AB (publ) is listed on Nasdaq Stockholm.
